BRITISH MUSEUM

L. S.

Cum forte animi causa Museæ aliquot hujus urbis inviserem, inter spolia marina aliquammultos Turbines Exoticos *adverti, quorum alios* Terrestres, *alios aquæ dulcis sive* Fluviatiles *esse probe cognovi: sc. ex analogia nostrorum Anglicanorum olim a me editorum. Cum autem nemo quod sciam (non qui vel data opera de his rebus scripserunt, quod tamen ijs vitio vertendum est) hos a marinis distingueret, operæ pretium esse duxi, ut qui in nostris manibus haberentur (qui sunt non pauci) aliorumq; in hac urbe Museis reperti sunt, ipse breviter enarrarem, literisq; et Chalcographiæ fideliter mandarem.*

Virorum autem à quibus plurisq; mutuò accepi, ut par est, mentionem fecimus: ut non mea tantum ea de re, sed et publice gratiæ ijs merito agerentur. At pre cæteris laude dignus est D.G.Courtein, *tam ob summam industriam, quâ hæc maximis impensis collegit, nitidè reponit, diligenter servat: quam ob singularem suam humanitatem, quâ mihi aliisq; rerum naturæ inquisitoribus facilem aditum præstat: nobisq; è penu suo locupletissimo, libenter copiam facit hæc aliaq; id genus delineandi describendiq;.*

Septuaginta autem et amplius Cochlearum Terrestrium *genera (ut de* Fluviatilibus *nunc taceam) jam, edidi: adeo haud verum est, quod nuper alicui tenuè visum est,* Terram ad Testacea generanda aquis minus aptam esse: *imo vix dubito quin* Terrestres Cochleæ *etiam Marinas specierum numero æquent: si non superent. At hæc, opinor, in causâ sunt, cur nonnulli aliter senserint; nimirum,* Terrestres Cochleas, *si Marinis referantur, magnitudine exiguas esse: Deinde harum testæ ferè leves et tenues sunt, sc: propter expeditum motum.*

3.

BRITISH MUSEUM

et ne suis bestiolis nimio oneri sint; adeoq; brevi pereant et dissipantur; cum Marinæ *propter plærarumq; crassitiem, vel extincto animali in ærum durent. Porro* Marinæ *Testæ continuis fluctibus in littus rejici solent: cumq; ferè validæ et crassæ sint, in unum locum assiduè accumulantur; at hæc causa* Terrestribus Cochleis *deficit, unde non nisi sparsim inveniuntur, densisq; vepribus et sylvis maximè occultantur. His accedit, ex omni parte Orbis* Marinas Cochleas *ex industria, facile, et ex uno colligunt maris cujusq; accolæ et nautæ. at* Terrestres *non nisi raro et casu ex ullâ transmarinâ regione nobis afferuntur, et propter difficultatem appulsus, et quod sylvæ et campi inter feros populos, imò mansuetos. Terræ certè continentis, non sine summo vitæ periculo adeantur, nedum perscrutentur. Quod autem* Terrestres Cochleæ Marinis et colorum varietate et pulchritudine non cedant (id*q; etiam contra quorundam sensum*) *ex descriptionibus nostris ut opinor abundè constabit. Preterea duo sunt, Lector, quæ te scire volui. Unum, ex his testis aliquot posse esse marinas; ejusq; adeo rei, ubi aliqua suspicio est, notam fore adpono.* Alterum, *in aliquibus colorem naturalem ferè perijsse credibile esse, sc. ubi ex toto albidæ sunt; at mihi ex vivis rebus ijsve perfectis descriptiones concinnasse fas non fuit; hanc fœlicitatem aliis relinquo. Hæc autem pauca et exigua literarum commodo et incremento, maximè Historiæ Naturalis, cui vehementer studeo, litavi.*

NB. This is to be placed in 3d membrane; being one of Roses Rolles with some irregular work: the Earl on ye left hand is four bigger than yt on ye right hand. it is ill figured in my book of English Rolls, because ye Figure was drawn from a worne old Roll. the faints of these are red, & some are marbled with white.

This is to be next with ye first of ye 3d membrane.

This shell is more flatt, both ye valves; it hath 14 large risings or ridges: is of ye deeper or longer sort. I have seen a pair of them with risings again in ye spaces. The shell was marbled with a darker Lair colour.

to be seen in Cabinets

There are some Cargo's of this kind of Shell: they come from China or Japan; for I have seen many pairs of them painted & guilt within side after the Chinese manner, to imitate the most fine Boxes.

This is how the gondoras shall be signified;
it hath also a double fillet in ye one side, wch is
ye difference of the marbled stone of this
Chapter; besides ye undulating of ye scales
much different from ye other sign.

NB This is by much ye
rarest ; I have
seen but one other.
